

| PRECISION CUTTING · HARD BRITTLE

ANT-SLWS

Single Wire Sawing Machine

Precision cutting of hard and brittle materials including Si, SiC, Quartz, and Graphite using a **diamond loop wire**. Minimizes kerf width while maximizing **cut quality**, delivering the optimal cutting solution for your process with enhanced stability.

Loop Wire

ROPE-TYPE DIAMOND WIRE

Flexible Cutting Size

FREE THICKNESS SETTING

High-Speed Cut

ROTATION & SAWING

KEY FEATURES

- 01 Diamond loop wire**
for high-precision cutting of hard brittle materials
- 02 Minimum kerf width**
reduces loss of expensive materials — improved yield
- 03 Customized design**
tailored to material shape and size requirements

ABOUT SAEHAN NANOTECH

Precision machining equipment for hard & brittle materials — built in Korea, delivered worldwide
